## HISTORY

# HISTORY

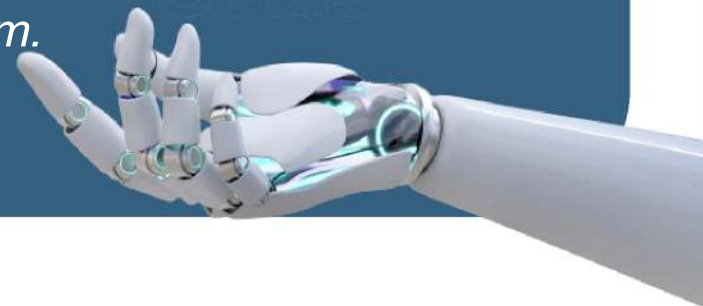

- For more than 14 years, thanks to its solid experience and engineering know-how, KM has been providing tailor made power solutions that can efficiently operate even under the most challenging conditions for major international projects such as constructions, telecommunications, data centers, shopping centers, hotels, supermarkets, sport centers, hospitals, research centers, educational institutions

- Today, thanks to its high-quality generator sets approved with international quality certifications which are made of world's top engine brands coupled to well know alternators to meet projects' requirements of different output ranges, and fast and effective after-sales technical support and maintenance services.

*The company is well established and it is currently successfully operating in Iraq.*

- we are always looking to constantly improve the quality of our products and employ highly experienced and valuable staff members to join our team.

# VISION

## KM Company

*is always your reliable power solutions partner whenever and wherever you need.*

## Generator services

### 01 Overview

We sale Teksan Generator the proud of Turkey Industrial Powered by engine like (Perkins UK , Doosan Korea , Baudouin France) from 9 KVA to 2800 KVA generating heads like (Lory Somer France– Crampton India )

### 02 After Sale

We believe that after sales services are more important than the sales process itself. KM team assists you in the purchase & provides high quality services from installation to Genuine Parts support, use and maintenance of your diesel generator set. Our hard-working team ensures that no matter where you are, you can avail of expert support from highly skilled service engineers.

### 03 Installation

#### • Choosing the perfect location

While determining a suitable location for your generator set there are many aspects you have to take into consideration. Access, space for maintenance, noise, ventilation, exhaust piping, fuel piping, humidity, and temperature are some of the factors that must be considered. A location where temperature conditions are controlled and noise isolation from main working area is preferred.

#### • Level of ground

The generator should be placed on a level surface, prevent its contact from rising water levels.

#### • Electrical connections (wiring)

To connect a standby generator to your existing electrical system, you'll need a separate device called an Automatic Transfer Switch. he transfer switch is an essential safety system that prevents your generator from feeding electricity back to the local power grid. Do not attempt to install a transfer switch yourself. Installation of transfer switches always requires a professional electrician. The model of transfer switch will depend mainly on the size of your generator. In very high-priority situations such as hospital

#### • Connecting the fuel tank

#### • Testing the generator

## 04 Maintenance:

KM offers the utmost in generator support and repair, with fully trained engineers and a fleet of resources. KM is able to offer a total package in power maintenance on any type of generator regardless its origin or brand for twenty-four hours a day, 365 days a year.

We also provide maintenance contracts that include periodical maintenance & technical check-ups according to the customer need.

We also provide maintenance contracts that include periodical maintenance & technical check-ups according to the customer need.

Contact our service department for details on maintenance contracts and services available for all generators regardless of supplier or brand.

Our engineers provide up-to-date technical information and provide answers to technical queries related to:

Engine model identification      Power curves      Heat balances

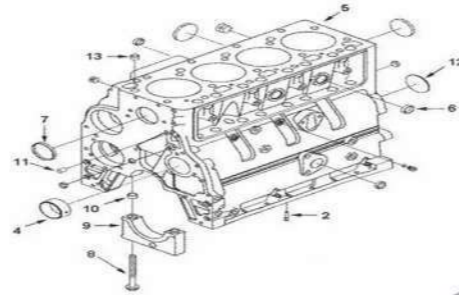

Engine service and repair      fuel consumption      Noise

We also provide technical assistance and problems solving.

# Spare Parts:

Original spare parts whenever you need them, with a reliable price guarantee. Reliable power is always with you for original spare parts.

## KM Spare Parts

has been formed to cater genuine parts and accessories of diesel power generators in the KRG-Iraq market.

It is one of the biggest stockiest of genuine parts of all the well-known generator brands including Maintenance, Repair and Overhaul items of all series of generators from 9 kVA to 2500 KVA.

## Our Products:

- Original Alternator accessories and spare.
- Deep Sea Electronic and DATAKOM products like Controllers, Battery charger, extended modules.

*We have a wide variety of spare parts, such as:*

Heater engine block

Pumps: Fuel pump & water pump Doosan

Dynamo

Sensors

AVR

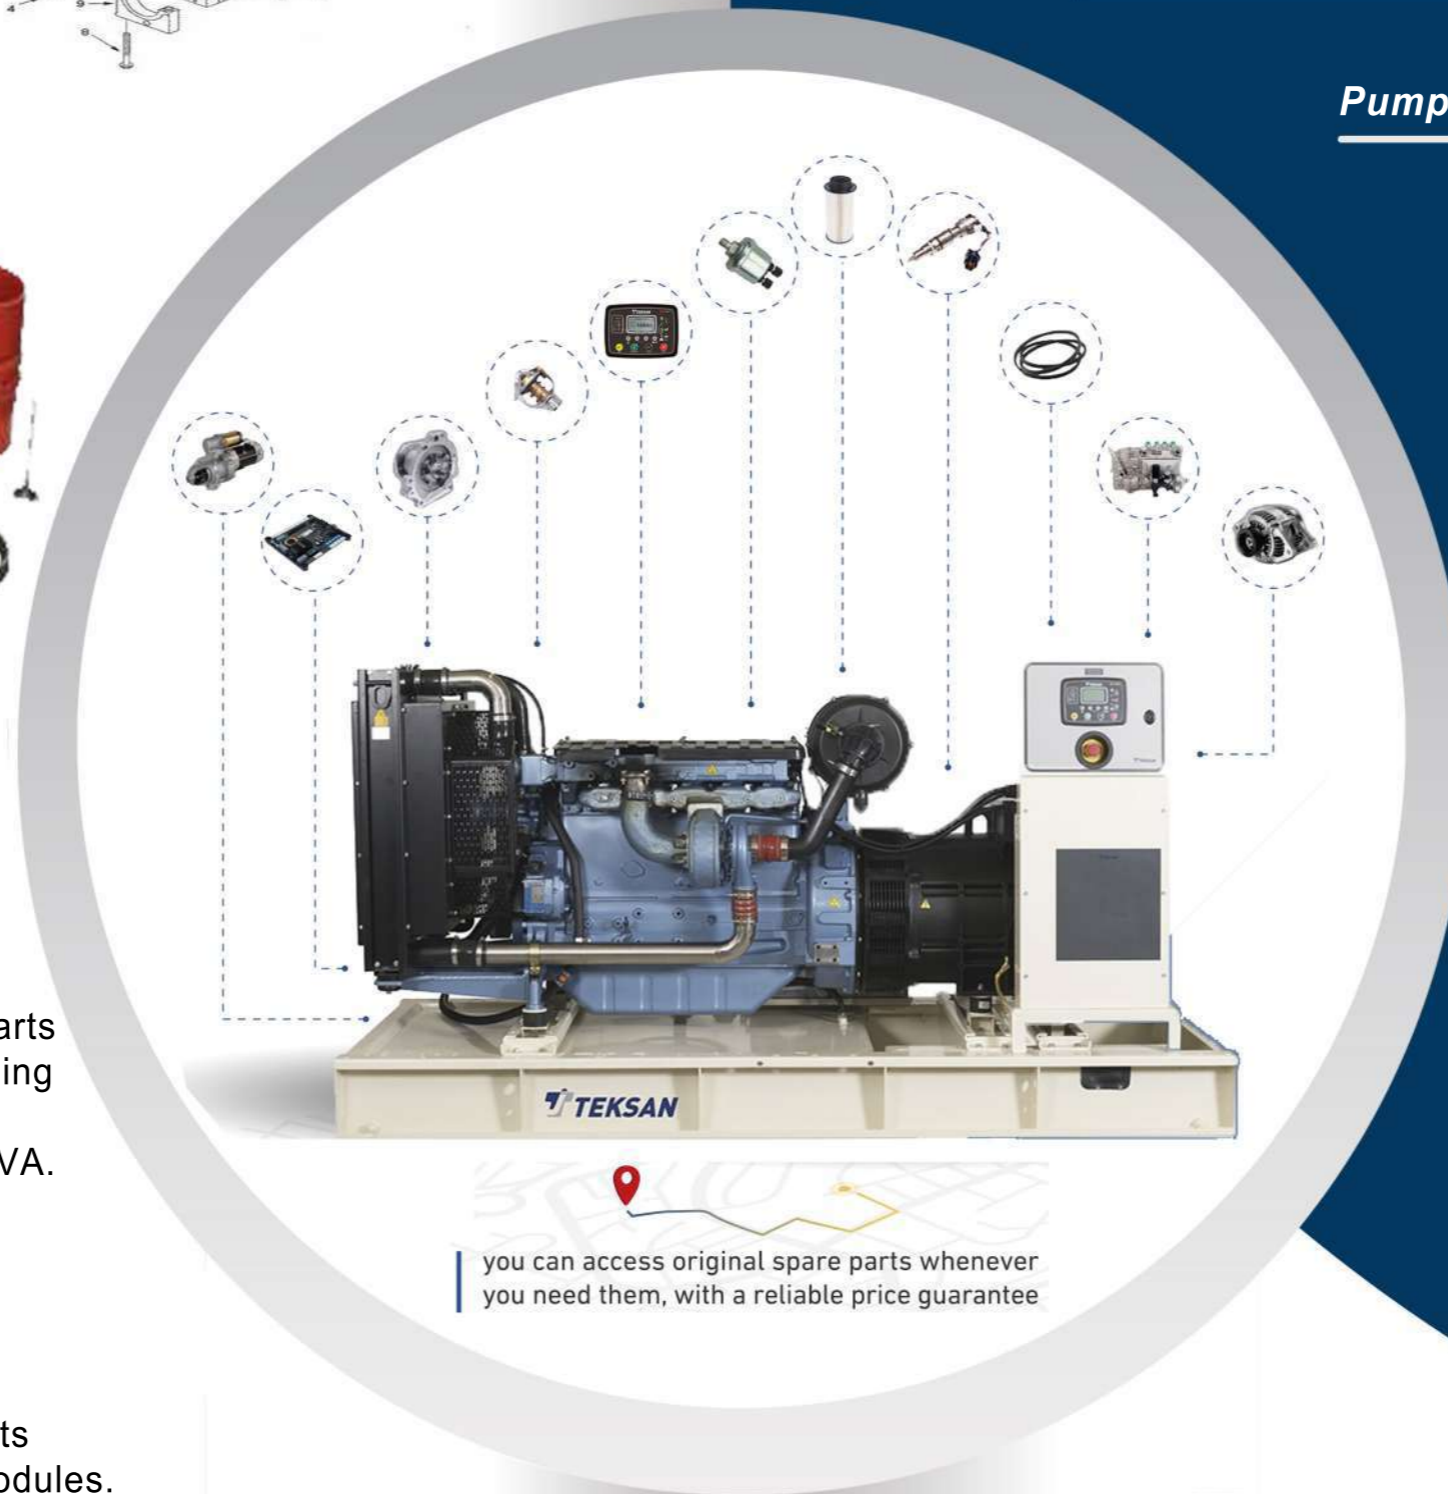

Battery Charger

Power Relay

Circuit breakers

Belts

Datakom Screen

you can access original spare parts whenever you need them, with a reliable price guarantee

# OPET OIL LUBRICANTS

We use a well-recommended viscosity of oil 15w-40 for Teksan Generator.

Full master 15W-40, is a diesel engine oil that is developed with combination of modern technology additives and high-quality base oils.

It completely fulfills the lubrication requirements of naturally aspirated or turbocharged diesel engines of generator. Its special formula keeps engine parts clean and provides effective protection especially in frequently used and high mileage diesel engines.

Packaging Dimensions:  
(4L ,7L, 205L and 205 L)
